# NITRILE EXAMINATION GLOVES

## EFFECTIVE, AFFORDABLE AND TRUSTWORTHY PROTECTION

Powder-free nitrile examination gloves from a world-leading nitrile glove manufacturer. FDA 510(k) cleared and conforms to ASTM D6319. Regulated under EU Type-Examination for Regulation 2016/425/EU for Personal Protective Equipment by a Notified Body.

Nitrile gloves provide a great alternative to latex gloves for use in medical and industrial applications.

Longterm high-volume production capacity available.

Sumner Group Health Medical Supplies Limited leads the way in the supply of nitrile gloves to hospitals, state and federal agencies, local governments, and private businesses across the globe.

We strive to ensure our customers get the quality protection they need. Our nitrile examination gloves are manufactured to meet international quality standards, and our team of specialist staff deliver world-beating protective gloves.

At SGH Medical Supplies sustainable practices rank high on our business agenda.

## BENEFITS OF NITRILE GLOVES

Our nitrile examination gloves provide an effective and affordable alternative for individuals who are prone to skin irritation and allergic reactions:

- ◆ Excellent chemical resistance offering a superior level of protection to traditional latex gloves
- ◆ Designed with high tensile strength delivering excellent puncture and wear resistance
- ◆ High strength and elasticity providing additional protection from hazardous debris
- ◆ Thin gauge to enhance sensitivity
- ◆ Manufactured from 100% nitrile
- ◆ Beaded cuff makes donning easy and helps prevent roll back
- ◆ Anatomical design for a more natural and comfortable fit even for extended periods
- ◆ Manufactured with an optimal thickness to allow for good heat dissipation that reduces sweating and skin irritation
- ◆ Micro-roughened finger tip surface provides excellent wet and dry grip
- ◆ Accredited and approved for the most demanding of needs

## PRODUCT SPECIFICATIONS

<b>Indications for use</b>	A powder-free, disposable, examination glove intended for medical purposes that is worn on the examiner's hand to prevent contamination between patient and examiner.	
<b>Material</b>	Nitrile	
<b>Type</b>	Powder free, non sterile
